

SYED SHERAZ AMJAD

DevOps Engineer

Lahore, Pakistan · +92 306 9275494 · sherazamjad933@gmail.com · LinkedIn · GitHub

PROFESSIONAL SUMMARY

Results-driven BSCS graduate and Microsoft Certified DevOps Engineer Expert, with hands-on experience across AWS (EC2, S3, Lambda, CLI), Microsoft Azure, Docker, Kubernetes, CI/CD automation (GitHub Actions/Workflows), Terraform (IaC), Linux administration, networking, monitoring tools, and shell scripting. Currently working as a DevOps Engineer at Zemotify, where I led a full server migration and security remediation effort. Also experienced in Flutter mobile development, with a track record of building, containerizing, and deploying scalable applications end-to-end.

CERTIFICATIONS

- Microsoft Certified: DevOps Engineer Expert — Credential ID 8410A366B8A7F000, Certification No. BCCAB4-H8D6D7 — Earned Sep 15, 2026, Expires Sep 16, 2027
- Microsoft Certified: Azure Administrator Associate — Credential ID 678FF686B7872ECA, Certification No. 3514C3-49E8D4 — Earned Sep 15, 2026, Expires Sep 16, 2027

WORK EXPERIENCE

DevOps Engineer | Zemotify

Jun 2026 – Present

- Led migration of company websites from a compromised server to a new, secure server after the previous server was attacked.
- Designed and managed CI/CD pipelines using GitHub Actions/Workflows for automated build, test, and deployment.
- Containerized and deployed applications using Docker; managed images, containers, volumes, and logs.
- Provisioned and managed cloud infrastructure as code using Terraform (IaC).
- Deployed and managed application workloads on Kubernetes, including pods, deployments, and services.
- Performed day-to-day Linux server administration and management — user access, packages, services, and system hardening.
- Wrote automated shell scripts for website and database backups (to remote storage) and for security scanning.
- Set up monitoring tools and alerting to reduce the risk of future incidents and ensure server uptime.
- Configured and managed a load balancer to distribute traffic across servers and improve availability.
- Coordinated DNS and server reconfiguration to ensure a smooth, low-downtime cutover to the new infrastructure.

DevOps Intern | Ebryx (Pvt.) Ltd

Apr 27, 2026 – Jul 15, 2026

Internship officially confirmed via experience letter, DevOps Team

- Worked across the MERN stack (MongoDB, Express.js, React, Node.js) alongside core DevOps responsibilities.
- Containerized MERN applications using Docker, including multi-stage builds for smaller, optimized production images.
- Built and maintained CI/CD pipelines with GitHub Actions, cutting deployment time from roughly 10 minutes down to about 3 minutes.
- Managed Docker images, containers, volumes, and logs, and pushed images to Docker Hub.
- Tracked sprints and tasks in Jira and participated in Agile ceremonies and code reviews.
- Recognized by management as sincere, hardworking, technically sound, and result-oriented.

Flutter Intern | Semicolons Tech

Sep 05, 2025 – Feb 05, 2026

Internship completion officially certified by Semicolons Tech, HR Department

- Developed and maintained the Joya Hotel App — implemented the full booking flow, UI enhancements, and smooth in-app navigation for hospitality users.
- Built the Festival Rumours App, handling event-based data display and user interaction modules.
- Improved UI/UX design across both applications and performed debugging and performance optimization.
- Worked with Flutter, Dart, Firebase, Git/GitHub, and Android Studio throughout the development lifecycle.

- Involved in UI development, state management, API integration, bug fixing, and testing; recognized for enthusiasm, dedication, and willingness to learn.

KEY PROJECTS

Netflix Clone (Full Stack + DevOps) — MERN Stack · Docker · AWS EC2 · GitHub Actions

- Built a full-stack Netflix-style streaming platform clone using MongoDB, Express.js, React, and Node.js.
- Containerized the application with Docker and deployed it to an AWS EC2 instance.
- Implemented a CI/CD pipeline with GitHub Actions for automated build, test, and deployment.
- Applied DevOps practices end-to-end: containerization, CI/CD automation, and cloud hosting.

Security Scan & Server Migration — Shell Scripting · Linux · Server Administration

- Authored shell scripts to automatically scan website files and databases for suspicious code following a server attack.
- Migrated multiple production websites to a new server with minimal downtime.

Joya Hotel App — Flutter · Firebase · Dart · Git

- Full hospitality booking app enabling guests to browse rooms, make reservations, and manage bookings in real time using Firebase Firestore and Auth.

Festival Rumours App — Flutter · Firebase · Dart

- Lifestyle and events discovery app with event feeds, likes/comments, and dynamic content powered by Firebase.

TECHNICAL SKILLS

DevOps & Cloud: AWS (EC2, S3, Lambda, CLI), Microsoft Azure Administration, Docker (Compose, Multi-stage Builds, Docker Hub, Volumes, Logs, Containers), Dockerize Application Deployment, Kubernetes (Pods, Deployments), CI/CD Automation (GitHub Actions, GitHub Workflows), Terraform (Infrastructure as Code), Load Balancing, Linux Administration, Networking, Monitoring Tools, Shell Scripting

Mobile Dev: Flutter, Dart, MVVM Architecture, State Management (BLoC, Provider, GetX), UI/UX Implementation

Firebase: Authentication, Firestore, Cloud Messaging (FCM), Storage

Tools & Practices: Git, GitHub, Jira, SDLC, Agile/Scrum, VS Code, Android Studio, Xcode

Soft Skills: Problem-Solving, Analytical Mindset, Attention to Detail, Communication, Teamwork, Adaptability

EDUCATION

Bachelor of Science in Computer Science (BSCS)

National University of Modern Languages · Oct 2021 – Sep 2025
